My guess would be they will become area sources through permit limits, since they really don't want to install controls, but we'll see.

I wonder if they will become area sources thru the installation of controls? No Area Source MACT, correct?

I suggest as soon as we get the requests we build a table with Source, Region, State and the nature of the request – installation of controls to meet MACT, request for time to become an area source, other (and what they are asking for), and the date by which they will comply.

It would be great too if we had a timeline of our required actions. I asked Jodi if we built one for PVC and she said no, but PVC was handled thru the states so we didn't worry so much. IMHO we will need to engage the state immediately, they may wish to handle themselves and they are delegated to do so.

FYI. Just got off the phone with Brian Storey and Keith Barnett. They are going to scan the compliance extension requests and send them over, but want a meeting with us before we do anything to let them know how we intend to proceed (they are expecting blowback if OECA decides anything other than immediate approval). They said they now

have requests for 17 facilities with about 2 that are asking for more time to install controls and 15 that are asking for more time to become area sources (presumably under the new non-OIAI policy).

Sara,

Thanks for reaching out. Once you receive the requests from Brian, you will need to quickly set up a meeting with the relevant parties – AED, OGC, the impacted regions.

Brian,

Can you scan over the requests you've received, since we are currently on the 30 day clock to respond? Thanks.

Brian,

Did you hear anything about any extension requests yet, now that the deadline has passed? Thanks.

Attached is a copy of the fact sheet that went out as part of the 2015 rulemaking. Take a look and let me know if there is any additional information you would need. I am looking for something regarding the recent court decision, although I don't think anything exists as of yet.

Brian,

In prepping for my briefing this afternoon, do you have any background documents available on the Brick MACT changes in 2015 or anything from OGC summarizing the various cases up to this point? Thanks for any help you can provide.
